#### TASTE THE WINE

The cellar allows the wine to be brought to temperature before tasting. Bringing it to temperature awakens the aromas and allows you to appreciate the wine when tasting it.

#### PRESENT THE WINE

The glass door with anti-uv treatment protects the wine from light and enhances it. The wine collection is preserved while being accessible and presented on traditional beech wood shelves.

#### STORE WINE

The electronically adjustable cold system is suitable for storing wine while waiting for tasting. The temperature range has been defined to accommodate the heating of different types of wine.

#### CLIMADIFF EXPERTISE

For 11 generations Climadiff has preserved and brought wine to tasting temperature. Preciously preserved in our cellars, the wine ages and improves and becomes your heritage.

### Eco-responsibility

Our products are manufactured in compliance with European environmental rules. Especially, refrigerant fluid (R600a) doesn't reject neither CFC nor HFC and respect environment.

Energy consumption is calculated based on the result obtained for 24h in standard test conditions. The actual energy consumption depends on the conditions of use and location of the device.

This equipment is designed to be used in an ambient temperature between 18-25°C.

This appliance is intended to be used exclusively for the storage of wine.

Alcohol abuse is dangerous for health, please consume in moderation.

\*Capacity given as an indication with 75cl Bordeaux traditional type bottles and measured with shelves. Adding shelves reduce considerably the total capacity.

\*\*Thanks to the Vinotag® application, benefit from a digital register of your wine cellar and be alerted of the peak dates of your wines. In partnership with Vivino, scan your bottle to access its pre-filled wine sheet.
